#### What is Concept Evolution™?

Concept Evolution<sup>™</sup> is a web-enabled, complete CAFM solution, and the next generation of FSI's multi award-winning Concept<sup>™</sup> CAFM range, retaining key features, functionality, and crucially compatibility, from the current Concept<sup>™</sup> generation range.

Concept Evolution<sup>™</sup> merges powerful functionality with sophisticated technology to extend facilities management across borders, and optimise process efficiency, accuracy and productivity throughout the lifecycle.

Easily accessed through a standard web browser, Concept Evolution<sup>™</sup> offers an extremely powerful, flexible, and easy-to-use software platform that leverages the web to provide a single, integrated view of facilities and maintenance activities across your portfolio.

By centralising data and processes throughout the facility management lifecycle, Concept Evolution<sup>™</sup> provides a secure, seamless flow of information across locations, divisions, operations, people and projects.

Concept Evolution<sup>™</sup> makes critical operational data available on-demand to users in any location.

It offers a single, holistic view of all facilities and maintenance activities, and can easily track every location, asset and person: analyse the processes, costs and efforts required for optimal operations, and understand the impact of acquisitions, utilisation, maintenance, improvements, service provision and expenditures.

#### Who uses Concept Evolution™?

Concept Evolution<sup>™</sup> is suited to organisations managing single facilities through to global property portfolios, or who focus on a singular aspect of facilities operations. Stay on time and on budget, driving significant cost savings that translate to long-term profitability with Concept Evolution<sup>™</sup>.

#### Concept Evolution<sup>™</sup> functionality includes:

- Asset condition and criticality management.
- Asset register and asset management.
- Buildings & locations property register.
- Comprehensive task auditing through event features.
- Concept<sup>™</sup> Reports for ad hoc report writing.
- Comprehensive contract management.
- Customer satisfaction feedback.
- Document management.
- Fast sign off and resource timesheet.
- Financial control including definable budgeting cost capture and monitoring.
- Graphical drag and drop planned preventative maintenance (PPM planner with resource utilisation and optimisation).
- Comprehensive Service Level Agreement (SLA) Control.
- Health & Safety notification.
- Comprehensive call logging facility.
- Logging of personnel details.
- Design and assignment of shift and rota patterns.
- Follow on and ad hoc (other works) tasks.

#### Let us help change your world.

- Planned events diary.
- Concept<sup>™</sup> Reports designer.
- Resource Register and Labour Management.
- Supplier register.
- System security and access control.
- Task authorisation, control and history.
- Swift production and issue of permits to work.

### Concept Evolution<sup>™</sup> features and benefits include:

- Compliance Register for linking Instruction Sets, Tasks and PPM schedules to a comprehensive Compliance Type register with control of due dates and compulsory certification for compliance tasks.
- Comprehensive Computerised Maintenance Management Software (CMMS) functionality combined with multi service FM control: gives you command of your day-to-day FM requirements.
- KPI performance monitoring across the lifecycle of any task with up to five user definable milestones/points/ stages/critical points.
- Mobile solutions functionality: seamless integration between back office and mobile workforce.
- Integration via Workflow Pro<sup>™</sup> with existing hardware and software applications: provides in-depth automation of business processes.
- Seamless bi-directional integration with Autodesk CAD applications.
- Multi discipline helpdesk: full control of all hard and soft services issues and requests.
- Segregation of regional and operational customer data from within a single database: allows for the management of regions, multiple customers and service providers from within one system.
- Manage customer contracts: easy access to task rates, job schedules, resource charges, contract status, validity dates, cost, SLA's and auditability of events.
- Concurrent user licences with no workstation restrictions and the potential for unlimited users: provides costeffective deployment.
- Named user licenses providing guaranteed system access.
- Providing Web access to the FM function for both FM personnel and end clients offers rapid rollout and low

cost of ownership.

- Automated e-mail production supported (also available via Workflow): allows definition of business rules to keep customers, managers, supervisors and other personnel up to date with FM activities.
- Safe Third Party Security Access: benefits include client and subcontractor access through core application or via Concept Connect<sup>™</sup> Self Service Portal.
- Simple and easy to use graphical user interface.
- Multi-tiered cost structure which supports existing organisational and financial breakdown/account codes.
- Concept<sup>™</sup> Reports for ad hoc report writing: provides a comprehensive on-board reporting tool with no additional licence costs.
- Integration with Cognito mobile data solutions.
- Integration with 3rd party hardware and software systems.
- Industry standard databases supported including Microsoft SQL Server and Oracle.
- Ability to offer data segregation, managed via multiple database application using a single installation/ deployment/system.
- Advanced SLA matrix: allows user definable Key Performance Indicators (KPI's) to be set against almost any entity.
- Real time SLA escalations utilising user definable performance thresholds.
- Digital Dashboard: a real-time, easy-to understand graphical representation of Key Performance Indicators (KPI's) within Concept<sup>™</sup>, defined and tailored according to your requirements.
- Resource Planner to promote labour loading and utilisation of the engineers and supply chain.
- Hazards & Warnings for seamless transparency of risks or notifications through the task lifecycle.
- Concept Reach<sup>™</sup> and Concept Connect<sup>™</sup> Self Service Portals to cater for remote access for clients/end users and disparate supply chains.
- Native App delivery through industry standard operating systems such as Apple, Android and Windows.
- Seamless filtering and exporting of data to MS Excel without the need for reporting tools.
